

*Australian research organisations
have a higher rate of success
in their applications than non-EU
research organisations in total*

The EU is Australia's
largest
science and
technology partner.

Between 2007-2014 the *total investment* in projects involving at least one Australian partner was over

*Australia was the
first country
to sign a scientific
agreement with
the EU.*

*Since 1994, Australian participation
in EU research programmes
has grown from **18 projects** to*

71 research staff exchange projects

have supported

500 staff from Europe

spending time in Australia and more than

250 Australians

going to Europe
